## OUR HISTORY

## CERAMIC ART & PATENTS

CinqueSegni comes in 2008 from the desire of five friends to give a new light to the wine tradition, bringing together two Italian excellences: Wine and Art.

The Company name is inspired by the five signs which each of the founders has engraved in their vineyard with the promise to realize their ambitious dream together. The enhancement of the terroir, the protection of the wine making tradition and the continuous pursuit of the quality on one hand, and the innovation in design inspired by Italian art on the other hand, created a unique product distinguished by a particular ultra-thin ceramic label patented in the main Countries worldwide. For these reasons CinqueSegni is considered an exclusive company, an “Art Winery”, where art and creativity are the main elements which inspire the wine production.

It is here, on the famous and marvelous Amalfi Coast, a land of ancient ceramic traditions, that the idea of CinqueSegni was born, to realize and patent an ultra-thin ceramic label and where our prestigious labels are produced by hand.

CinqueSegni is the only winery in the world allowed to offer this exclusive packaging.

The company is extremely careful and sensitive to the environment problems, for this reason the labels are made with raw materials, which make them recyclable at 100%.

Innovation into packaging is inspired by the ancient tradition of Vietri sul Mare, a small village on the Amalfi Coast, as well as Positano, the which ceramic art is famous all over the world with its sinuous shapes and pastel colors typical of the Mediterranean area.

The soil and the manual processing are the common elements between wine and ceramic art. As well as our farmers pick up the grapes and use their hands to transform them in wine, also our craftsmen shape the ceramic with their hands and afterwards they combine it with the wine to create an indissoluble bond between the two elements.
